S E C R E T29 March 1945

314th Field Artillery Battalion crossed Rhine River and moved to Kloppenheim (M 4066) in Direct support of 318 Combat Team.

30-31 March 1945

Combat Team 318 attached to Sixth Armored and moved to Lindenstruth and then to Uppershausen (H 1277). Combat Team 318 in Six Armored Reserve.

During the period covered by this report liaison was maintained with Combat Team 318, one Liaison Officer with each Battalion and one with Regiment. Each Company of 318th Infantry Regiment had a Forward Observer. Liaison was also established with the Tenth Armored when in General Support. During the period that 314th Field Artillery Battalion was in General Support of the Tenth Armored and Sixth Armored liaison was kept with 80th Infantry Division Artillery for Intelligence and future control purposes.

A total of one hundred and fifty (150) prisoners were captured by members of 314th Field Artillery Battalion during the period all without resistance

The Forward Observers and the Infantry had difficulty in determining their location while passing through heavy woods so a system was adapted whereby high air bursts would be fired over previously determined check points on call. This method has proved helpful many times.

Air observation was continuous during the period weather permitting.

Maps were issued in large enough quantities but usually arrived after the operation had begun making it very difficult to get them into the hands of the Forward Observers.

DECLASSIFIED
Authority NND735017SECRETSECTION III1st March 1945 to 31 March 1945:

All supply functions during the month were satisfactory. Reports are rendered by respective classifications.

CLASS I

Rations have been issued satisfactorily although the condiment issues are insufficient and lack variety.

CLASS II

Clothing issues have been satisfactory with the exception of field jackets, cotton underwear, and various size shoes. Difficulty is had providing replacements for worn shoes bearing odd sizes and of EE width. There is great need of fire direction material such as acetate, scotch tape, and china pencils.

CLASS III

Requirements have been met very satisfactorily.

CLASS V

Ammunition resupply has been very satisfactory.

MOTOR NOTES

The critical requirement of hot patches for tire repairs and the shortage of tubes and tires for 1/4 ton and 2-1/2 ton vehicles still exists.

Recommendations:

That condiment issues be increased and that fresh fruits and vegetables be issued more often.
